Tributary To:

County: Placer

Diversion within: NW 1/4 of SE 1/4 Section 27, T 15 N, R 10 E, MDB&M

Year of First Use: 1870

Name of Diversion works:

Assessor Parcel Number
of the Diversion site: 064-240-020

A. **Water is Used Under:** Riparian claim ☐ Pre-1914 claim ☒ Court Decree No.: Other (explain): APPROPRIATIVE

B. **Year of First Use:** (Please provide if missing in the Division of Rights database (ewrims))

C. **Rate of Diversion:** The rate of diversion of water for each month used and entered in the table below is shown in units of:
Gallons per minute (gpm) Gallons per day (gpd) ☒ Cubic feet per second (cfs)

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Average Rate
2006	5,760	5,760	5,760	5,760	5,760	5,760	trickle of water				5,760	5,760	4,800 gpd
2007	5,760	5,760	5,760	5,760	5,760	5,760	trickle of water				5,760	5,760	4,800 gpd
2008	5,760	5,760	5,760	5,760	5,760	5,760	no water in stream				5,760	5,760	4,800 gpd

D. **Quantity of Water Used:** The quantity of water used each month and entered in the table below is shown in units of:
Gallons ☒ Million Gallons (MG) ☒ Acre-feet (AF)

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2006	172,800	172,800	172,800	172,800	172,800	172,800	trickle of water				172,800	172,800	1,382,400 mg
2007	172,800	172,800	172,800	172,800	172,800	172,800	trickle of water				172,800	172,800	1,382,400 mg
2008	172,800	172,800	172,800	172,800	172,800	172,800	no water in creek				172,800	172,800	1,382,400 mg

E. **Purpose of Use** - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 10 acres; Stockwatering 4 animals; Domestic 2 households, 6 people
Other (specify) ORCHARD, PASTURE, garden, small pond, 4000 gal water tanks
Parcel Number(s) of Place of Use:

F. **Changes in Method of Diversion** - Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)
SAME

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ☒ NO ☐
Describe any water conservation efforts you have initiated: dep - system for gardens

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:
Year N.A. (AF/MG) Year (AF/MG) Year (AF/MG)

EWrights/cm
10/06/09

Reduction in consumptive use: NA
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation NA

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES _____ NO _____
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES _____ NO _____

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES _____ NO X
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used: NA
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)
I have data to support the above surface water use reductions due to the use of groundwater. YES _____ NO _____

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

C, D

In 2006 & 2007 there was very little water in Indian Creek and in 2008 I ran out completely during summer & early fall before rains.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ☐ NO ☒
- b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)
I have data to support the above surface water use reductions due to wastewater reclamation. YES ☐ NO ☐

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES ☐ NO ☒
- b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)
I have data to support the above surface water use reductions due to conjunctive use efforts. YES ☐ NO ☐

I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

I have been asked to write a few notes on the old Adelia Hill water ditch, which has been in use since the 1850's.

It has been a source of water for home and mining use for about a hundred and thirty five years. It has been renamed several times but it is described in the 1882 edition of Placer County History by Thompson & West.

I have been in the area for over seventy years, and my father and his father before him. This ditch has been in constant use all this time to bring water to homes and gardens as well as mining since it was built.

Sincerely

Herbert C. Macy
1212 - Rambling Rd.
Colfax, Calif., 95712

Together with all and singular the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining, and the revenues and revenues, remainder and remainder, rents, issues and profits thereof.

TO HAVE AND TO HOLD, all and singular the said premises, together with the appurtenances, unto the said part of the second part, and to their heirs and assigns forever.

Ladies and Gentlemen:

COMPLAINT INDIAN CREEK, PLACER COUNTY

The Division of Water Rights (Division) staff have completed the investigation of the complaint made by Ms. Patsy Rylance against Ms. Elaine Patterson and Mr. Wendell Ellis.

Division staff have reviewed records available regarding both Ms. Patterson's and Mr. Ellis' pre-1914 claim of right to divert water from Indian Creek. The Division has determined that the pre-1914 water right claims for both Ms. Patterson and Mr. Ellis appear to be valid. The Division also reviewed Ms. Rylance's claim of riparian right to divert water and concluded that Ms. Rylance does appear to possess riparian rights to divert water from Indian Creek for use on her mining claim.

Ms. Patterson and Mr. Ellis are required to bypass sufficient water to satisfy senior water right holders including those with valid riparian rights, such as Ms. Rylance, and those with senior pre-1914 rights.

Whether Ms. Rylance may exercise her riparian right by taking water from the diversion ditch (or from the pipeline which has replaced the ditch) is an issue relating to easements and is not within the authority of the State Water Resources Control Board (State Water Board). The State Water Board has limited authority over disputes involving easements or disputes regarding water diversions between pre-1914 and riparian right holders. These disputes would have to be resolved by agreement between the parties or in a court of proper jurisdiction.

As noted in the enclosed letter dated August 15, 1991, Warden Jim Randell of the Department of Fish and Game has determined that the conversion of the ditch to a pipeline is not in violation of the Fish and Game Code. The dam which existed with the previous ditch system has now been breached so that free passage of fish in the stream is maintained. Any future changes to diversion

works in the stream channel may require a stream alteration permit from the Department of Fish and Game. Based on the available information, it appears that the Patterson and Ellis diversion is not causing harm to the fish and wildlife resources of Indian Creek.

Based on the facts stated above, the Division will not take any further action on the complaint. If you disagree with these findings, you may request a hearing before the State Water Board. A request for hearing must be made within 30 days of the date of this letter. However, in the absence of any significant and convincing documentation that would lead to different conclusions, staff will not recommend a hearing.

If you have any questions, please call Lewis Moeller at (916) 657-2050.

Sincerely,

151
Edward C. Anton, Chief
Division of Water Rights

Ladies and Gentlemen:

COMPLAINT INDIAN CREEK, PLACER COUNTY

The Division of Water Rights (Division) staff have completed the investigation of the complaint made by Ms. Patsy Rylance against Ms. Elaine Patterson and Mr. Wendell Ellis.

Division staff have reviewed records available regarding both Ms. Patterson's and Mr. Ellis' pre-1914 claim of right to divert water from Indian Creek. The Division has determined that the pre-1914 water right claims for both Ms. Patterson and Mr. Ellis appear to be valid. The Division also reviewed Ms. Rylance's claim of riparian right to divert water and concluded that Ms. Rylance does appear to possess riparian rights to divert water from Indian Creek for use on her mining claim.

Ms. Patterson and Mr. Ellis are required to bypass sufficient water to satisfy senior water right holders including those with valid riparian rights, such as Ms. Rylance, and those with senior pre-1914 rights.

Whether Ms. Rylance may exercise her riparian right by taking water from the diversion ditch (or from the pipeline which has replaced the ditch) is an issue relating to easements and is not within the authority of the State Water Resources Control Board (State Water Board). The State Water Board has limited authority over disputes involving easements or disputes regarding water diversions between pre-1914 and riparian right holders. These disputes would have to be resolved by agreement between the parties or in a court of proper jurisdiction.

As noted in the enclosed letter dated August 15, 1991, Warden Jim Randell of the Department of Fish and Game has determined that the conversion of the ditch to a pipeline is not in violation of the Fish and Game Code. The dam which existed with the previous ditch system has now been breached so that free passage of fish in the stream is maintained. Any future changes to diversion

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1991. (Additional information on reverse side of this form.)

A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts ☒ Gallons
below are: ☐ Acre-feet
☐ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1988	X	X	X	X	X	X	X	not running					34,000 est.
1989	-			X	X	not running							
1990			not running										

B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 10 ACRES

Stockwatering 7 MISC SMALL STOCK

Domestic TWO TO FOUR PERSONS

Other (specify) FIRE CONTROL

C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

A. 230 ft. 10" pipe on water line rotted; therefore, the Ellis's at end of water ditch & I are in the process of piping the whole ditch. Completion date should be FALL of '91!

D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

Water come from Indian Creek - It's been tested and is drinkable.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water. Taggart Ingraham and Cevera M. Ingraham, his wife
Address Rt. 1, Box 331, Newcastle, California 95658

B. Name of body of water at point of diversion Indian Creek
Tributary to North Fork American River

C. Place of diversion S. E. 1/4 Section 27, Township 15 N., Range 10 E., MD B&M,
Placer County, or locate it on sketch of section grid on reverse side with regard to section line, or prominent local landmarks.

D. Name of works None

E. Capacity of diversion works 50 inches est. cubic feet per second
Capacity of storage reservoir negligible gallons per minute
State quantity of water used each month in gallons or acre-feet gallons
acre-foot

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1966	8000	7200	7200	8000	14000	23600	23600	23600	23600	23600	23600	23600	211,600

gallons

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. ----

Maximum annual water use in recent years 215,000 gallons
acre-foot

Minimum annual water use in recent years 150,000 gallons
acre-foot

Type of diversion facility: gravity YES ☒ YES

Method of measurement: weir _____, flume X, electric power meter _____, water meter _____, estimate _____

F. Purpose of use (what water is being used for) orchard, pasture, fire, sanitation, mining

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
entire parcel

H. Year of first use as nearly as known 1870

I. Name of person filing statement Taggart Ingraham
Position OWNER Organization none
Address Rt. 1, Box 331, Newcastle, California

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.
